<> Professional Summary

Full Stack Developer with **4+ years of experience** delivering scalable, high-performance web applications across fintech, SaaS, and identity verification industries.

Skilled in React, Next.js, Node, Typescript and cloud platforms with a strong foundation in databases and API design.

Proven track record leading small teams, collaborating with international clients in English, and shipping products that reach thousands of users.

Advocate of unit testing and modern AI-powered tools to accelerate development and improve code quality.

Work Experience

- Full Stack Developer - Capicua

Feb 2024 — Present

 - Developed web applications using primarily **Next.js, Typescript and Node**.
 - Designed and optimized **PostgreSQL** databases for client projects.
 - Refactored legacy components and improved unit test coverage**, enhancing code maintainability and reducing regression issues.
 - Collaborated directly with clients and teammates in English** to gather requirements, present solutions, and deliver results.
- Full Stack Developer - Airata

May 2021 — Feb 2024

 - Built fintech web applications with **React and Next.js**, including backoffice dashboards and identity verification tools.
 - Led a team of 3 developers** on a healthcare integration project, resulting in an app with 100,000+ downloads on the Play Store.
 - Built institutional **landing pages for the company and its main products MIA and Hooli**, boosting product visibility and customer acquisition.
 - Developed, maintained and optimized **MySQL stored procedures and Node microservices** supporting mission-critical operations.
 - Returned in May 2024 as a trusted consultant, providing ongoing project support by the hour.
- Freelance Full Stack Developer

Feb 2022 — Mar 2023

 - Colaborated with international clients and teammates in English across 5+ countries to deliver several web applications and landing pages.
